

## PRESS RELEASE

### Mician technology accessible through CST DESIGN STUDIO™

***June 8 2004, CST- Computer Simulation Technology, Darmstadt and Mician, Bremen have signed an agreement enabling the further expansion and interoperability of links between CST's design environment and other EDA simulation solutions.*** This latest agreement further promotes CST's aim to combine best-in-class solutions for the design engineers' benefit. Users of CST DESIGN STUDIO™ (CST DS) will have optional access to a subset of  $\mu$ Wave Wizard™'s fully parametric mode matching components (in particular rectangular waveguide steps, t-junctions and bends). A migration path from the CST DS subset to full  $\mu$ Wave Wizard™ functionality will be available.

$\mu$ Wave Wizard™ blocks can be added to a design by simple drag and drop operations, enabling the use of mode matching techniques in combination with full 3D and circuit simulation across borders of methods and vendors.

Similar to the integration of CST MICROWAVE STUDIO® (CST MWS) in CST DS, the  $\mu$ Wave Wizard™ graphical user interface will be directly accessible through that of CST DS.

#### **About CST**

CST's simulation tools help engineers achieve improved product performance and reduced time-to-market, by providing accurate 3D EM design solutions. The simulators CST MICROWAVE STUDIO®, CST DESIGN STUDIO™, CST EM STUDIO™ and MAFIA-4 have benefited from over 20 years experience in the area of numerical field calculation, and are used world-wide by market leaders such as Motorola, Nokia, Philips, Raytheon, Siemens, and Sony. A comprehensive network of distribution and support centres in Europe, the Far East and North America, ensures optimal service for every customer. More information is available on the web at [www.cst.com](http://www.cst.com).

CST-Computer Simulation Technology "Changing the standards for 3D EM simulation".

**About Mician**

Mician's corporate mission is the development of the well known fast Mode-Matching (MM) technique and its derivations for all implemented elements, and to accelerate full 3D simulation whenever possible. The realisation of this goal is carried out by Mician's fast EM-CAD tool  $\mu$ Wave Wizard™.  $\mu$ Wave Wizard™ can be used for simple as well as complex designs. The program features an open architecture for easy integration with existing software. Mician provides extraordinary support for challenging design tasks enabling a quick turnaround for all customers. Mician is represented by sales agencies worldwide. More information is available on the web at [www.mician.com](http://www.mician.com).
