

PRESS RELEASE

CST - Agilent Alliance: Phase One Completed

October 12th 2004, CST- Computer Simulation Technology announces the completion of phase one of the integration of CST MICROWAVE STUDIO® with Agilent ADS at EuMW 2004, booth #H52.

In addition to the existing option of importing planar layouts into CST MICROWAVE STUDIO® (CST MWS), users can now easily create ADS DAC components. This enables parametric access to S-Parameters of pre-computed 3D em simulations through the ADS schematic and makes use of the advanced interpolation schemes.

About CST

CST's simulation tools help engineers achieve improved product performance and reduced time-to-market, by providing accurate 3D EM design solutions. The simulators CST MICROWAVE STUDIO®, CST DESIGN STUDIO™, CST EM STUDIO™ and MAFIA-4 have benefited from over 20 years experience in the area of numerical field calculation, and are used world-wide by market leaders such as Motorola, Nokia, Philips, Raytheon, Siemens, and Sony. A comprehensive network of distribution and support centres in Europe, the Far East and North America, ensures optimal service for every customer. More information about CST is available on the web at www.cst.com.
