

PRESS RELEASE

CST Revenue Increase 39% in 2004

Darmstadt, March 18, 2005 – CST today announces continued success of software products with a worldwide revenue increase of 39% in 2004 compared to calendar year 2003. The average annual growth rate has been 37,8% since 1997 and has established CST as the dominant market leader in 3D EM Time Domain simulation. At the same time the company has consistently grown, increasing from a 12 to a 80 person company. CST's top product of 2004 was again CST MICROWAVE STUDIO® which was introduced in 1998 as the first member of the CST STUDIO SUITE™.

"We are pleased with the 2004 result as we are growing considerably faster than the overall 3D EM simulation market. This means we are not only benefiting from a strong demand for 3D EM software but also quickly gaining market share every year" said Bernhard Wagner, Managing Director, Sales and Marketing. "We were the first and are still the only vendor to offer time and frequency domain, hexahedral and tetrahedral meshing in one interface and this will guarantee our further expansion over the following years."

About CST

CST is one of the two largest suppliers of electromagnetic software and has continuously enlarged its position as market and technology leader in 3D Time Domain simulation. CST's simulation tools help engineers achieve improved product performance and reduced time-to-market, by providing accurate 3D EM design solutions. The simulators CST MICROWAVE STUDIO®, CST DESIGN STUDIO™, CST EM STUDIO™, CST PARTICLE STUDIO™ and MAFIA-4 have benefited from over 20 years experience in the area of numerical field calculation, and are used world-wide by market leaders such as Motorola, Nokia, Philips, Raytheon, Siemens, and Sony. A comprehensive network of distribution and support centres in Europe, the Far East and North America, ensures optimal service for every customer. More information about CST is available on the web at www.cst.com. CST-Computer Simulation Technology "Changing the standards for 3D EM simulation".
