

CALL FOR CONTRIBUTIONS

We are interested in your work with the CST STUDIO SUITE product family. If you would like to contribute to this event, share your experience, and discuss your questions in a forum of your peers, please submit a text abstract of between 100 and 200 words to events@cst.com.

A template is available from www.cst.com/euc.

CST honors your contribution to the EUC by offering a discount of 50% on the attendance fee for an accepted presentation. Please note that in order to qualify for this discount, the final abstract must be received by 26.02.2016 and the finished presentation by 18.03.2016.

Abstract submission deadline: February 26th, 2016.

Strasbourg

Located at a crossroads between the Latin and Germanic cultures, Strasbourg is rich with 2 000 years of history. Its Grande-Ile, a World Heritage site since 1988, was the first urban centre in France to be selected by UNESCO.

With its unique architectural patrimony, the city is brimming with wonders just waiting to be discovered, such as the cathedral, a masterpiece of gothic architecture, “a prodigy of the gigantic and of the delicate” as Victor Hugo would describe it, La Petite France, one of the most picturesque quarters, long ago the stronghold of tanners, fishermen and millers, and the German imperial quarter, a grandiose urban creation initiated after 1871.

The city boasts eleven superb museums ranging from archaeology to modern and contemporary art.

Strasbourg is also a European capital, the seat of major institutions such as the Council of Europe and the European Parliament.

With its vast pedestrian centre, pretty canals, characteristic quarters, many parks and green spaces, Strasbourg can be explored on foot, by riverboat, by tram... and even by bicycle – with its 500 km network of cycle trails, the city boasts the largest in all of France!

COMPUTER SIMULATION TECHNOLOGY

CST invites you to participate in the 11th European User Conference, April 25–27, 2016, at the Hilton Strasbourg, France.

The CST European User Conference (EUC) 2016 offers an informal and enlightening environment where engineers using CST STUDIO SUITE® tools can exchange ideas and talk with CST staff about future developments.
