

- PRESS RELEASE -**CST and Ageto MTT announce intensified partnership**

DARMSTADT, Germany, and TÄBY, Sweden, September 20th, 2011, Computer Simulation Technology (CST) and Ageto MTT announce an intensified partnership for local technical support in Sweden. Due to the increasing demand for CST's EM simulation tools, Ageto MTT has invested in providing highly qualified technical software support by recruiting a sales and applications engineer dedicated to CST's products.

CST is a supplier of leading edge electromagnetic (EM) simulation software. Ageto MTT represents over 20 leading manufacturers within the field of RF & Microwave products and services and distributes CST's products in Sweden, Norway, and Denmark.

Lars van der Klooster, Managing Director of Ageto MTT said *"We are delighted to offer technical support to CST's user base in Scandinavia. Ageto MTT has worked with the Scandinavian RF industry for more than 20 years. Due to the increasing demand for EM field simulation we see the technical support for CST's products as important extension to our services"*.

"CST has enjoyed constant strong growth in Scandinavia. We are happy to have a partner who can guarantee excellent technical support in this region," commented Marko Walter, Sales Director, CST. *"Together with our new regular local standard trainings in Finland and Sweden, Ageto MTT's experience will prove invaluable in supporting CST STUDIO SUITE users."*

About Ageto MTT

Ageto MTT is a local sales distributor located in Stockholm, Sweden. Its sales territory is primary the Nordic countries, Sweden, Finland, Norway, Denmark and Estonia.

Ageto MTT provides Technical Pre-Sales Support, Project Management and after sales services like Installation, Training, Applications Support, Design support, Calibration and Repair Services.

Its carefully selected product range and added services, give you the best time to market, test efficiency and the best possibilities to optimize your own success on your market.

Further information about Ageto MTT is available on the web at <http://agetomtt.com>.

About CST

CST develops and markets high performance software for the simulation of electromagnetic fields in all frequency bands. Its success is based on the implementation of unique, leading edge technology in a user-friendly interface. CST's customers are market leaders in industries as diverse as Telecommunications,

Defense, Automotive, Electronics, and Medical Equipment. Today CST employs 200 sales, development, and support personnel, and enjoys a market share of over 30% in high frequency 3D EM simulation. CST's flagship product, CST MICROWAVE STUDIO® (CST MWS) is the market leader in Time Domain simulation. It enables the fast and accurate analysis of high frequency devices such as antennas, filters, couplers, planar and multi-layer structures and SI and EMC effects. CST MWS can offer considerable product to market advantages such as shorter development cycles, virtual prototyping before physical trials, and optimization instead of experimentation. Further information about CST is available on the web at <http://www.cst.com>.
