New CST office opens in Poland

February 25, 2014 – Computer Simulation Technology (CST), Darmstadt, announces a new office in Warsaw, Poland, strengthening the sales and support channels for their electromagnetic (EM) simulation tools in the Baltic region.

The new CST branch office has been established to enhance the company's operations in Poland and will focus on offering a local, personalized approach to addressing the EM simulation needs of industry and academia. It will be the hub for sales efforts in the Baltic region and provide expert technical support to existing users.

The Baltic countries and Poland in particular, are thriving markets, with numerous academic and industrial institutions leading the way in technological development. The innovative research and development efforts taking place in these countries, alongside a growing interest in EM simulation software, have shown CST the potential for its products in the region.

“We see Poland as an important market for CST and we're happy that we now have a local office closely connected to this market,” commented Dr. Ralf Ehmann, CST Director of Sales for Europe, Africa & South America. *“The office also presents us with a great opportunity to further our activities in the Baltic countries.”*

“Through company visits and workshops, we will improve our understanding of this market's challenges,” said Jarek Kwiatkowski, Sales Manager for Central and Eastern Europe. *“Experience has shown that working closely with our customers will enable us to help them reach their development goals faster.”*

About CST

Founded in 1992, CST offers the market's widest range of 3D electromagnetic field simulation tools through a global network of sales and support staff and representatives. CST develops CST STUDIO SUITE, a package of high-performance software for the simulation of electromagnetic fields in all

frequency bands, and also sells and supports complementary third-party products. Its success is based on combination of leading edge technology, a user-friendly interface and knowledgeable support staff. CST's customers are market leaders in industries as diverse as telecommunications, defense, automotive, electronics and healthcare. Today, the company enjoys a leading position in the high-frequency 3D EM simulation market and employs 240 sales, development, and support personnel around the world.

CST STUDIO SUITE is the culmination of many years of research and development into the most accurate and efficient computational solutions for electromagnetic designs. From static to optical, and from the nanoscale to the electrically large, CST STUDIO SUITE includes tools for the design, simulation and optimization of a wide range of devices. Analysis is not limited to pure EM, but can also include thermal and mechanical effects and circuit simulation. CST STUDIO SUITE can offer considerable product to market advantages such as shorter development cycles, virtual prototyping before physical trials, and optimization instead of experimentation.
